Active patients	Critical	Escalated	Outreach pending	Stable / monitoring	Continuity restored	Doc completeness

TEAM CASELOAD — CM LEAD VIEW

J. Okafor	34	3 critical · 4 alerts in overflow
M. Chen	22	1 critical · 2 overdue
T. Brooks	16	0 critical · 1 outreach pending
R. Osei	12	0 critical · all within window

J. Okafor caseload exceeds capacity threshold. CM Lead: consider redistribution of 4 overflow alerts to T. Brooks or R. Osei.

OWNERSHIP & HANDOFF VISIBILITY 1 flag

Patient A — 00412	Care record: J. Okafor · Logged-in user: J. Okafor	Risk tier unconfirmed
Patient D — 00478	Care record: J. Okafor · Logged-in user: J. Okafor	Ownership confirmed
Patient J — 00399	Care record: M. Chen · No action logged in 52 hrs — possible informal transfer	Ownership mismatch
Patient K — 00455	Care record: J. Okafor · Logged-in user: J. Okafor	Ownership confirmed

Patient J — ownership reconfirmation required. No action logged in 52 hrs. CM Lead notified.

Prototype note: Status indicators reflect workflow position only — not clinical stability. Stable and Monitoring statuses do not indicate the patient is clinically well. Background threshold monitoring runs independently of dashboard sessions. CM Lead receives automatic notifications for all critical and escalation breaches regardless of case manager login status.
