

Psychiatric Post- Discharge Continuity of Care

A Decision-Support Dashboard
for Case Management

EVA BROWN

Psychiatric Post-Discharge Continuity of Care

- Patients may miss follow-up appointments after discharge.
- Coordination relies heavily on case manager vigilance.
- Missed follow-up creates continuity-of-care risk.
- Psychiatric deterioration can occur silently between documented interactions.

Why Does This Happen?

- Fragmented handoffs.
- Unclear ownership.
- Manual Tracking.
- Documentation Gaps.
- High caseload burden.
- Limited visibility into workflow failures.

Psychiatric Continuity Dashboard

- Patients may miss follow-up appointments after discharge.
- Coordination relies heavily on case manager vigilance.
- Missed follow-up creates continuity-of-care risk.
- Documentation prompts.
- Ownership visibility.
- Continuity status indicators.

Supporting Case Managers

- Prioritizes urgent cases.
- Reduces reliance on memory.
- Improves escalation visibility.
- Highlights documentation gaps.
- Supports continuity restoration.
- Provides role-specific view for different users.

Thank you.
